# S1

CE 0476

**ETHICAL IMPLANT SYSTEM**

## **Safety & Simplicity in Implantology**

A new streamlined, innovative and less-invasive practice

Unique modular design: less components and greater versatility of use

It is a customizable implant adjustable through standardised components.

It ensures predictable results regardless of either the individual skills of the dentist and the technician or the specific case of the patient.

S1 System offers guaranteed solutions, as it eliminates the risks of:

Unscrewing  
Bacterial infiltrations

• CE 0476

• Indian CDSCO Registration Certificate no. MD-1015

# FLYONE

INNOVATIVE SURGICAL GUIDE

## **The revolutionary technique for surgical guides**

It is a streamlined and very precise technique for the application of a stereolithographic model which can be attached to the articulator.

Flyone technique minimized mistakes and makes the implant placement more predictable.

It allows the dentist to work on a real model when he plans the surgery.

It is a simplified solution to the Flap-less technique.

• Patent pending. Application no. PD2012A000338

## **Training**

**R&D and Training  
are the fundamentals  
of Safe & Simple**

We are constantly focused on R&D, in order to be able to offer more and more innovative and simplified solutions.

We rely on the contribution of skilled collaborators and product specialists with clinical and technical expertise in order to guarantee complete customer assistance and training during the whole clinical and prosthetic process.

We take care of the organization of many structured courses and events in Italy and abroad. Also, we offer specialisation courses with the partnership of Italian Universities.
